The inspiration

RECLAIMING STYLE

Welcome to the Evoke Oaks, viewed by some as the natural evolution of our best selling Craft Oaks. Taking their style from upcycling and reclaimed timber influences, they are available in two distinctive designs, both full of character and featuring strong woodgrain patterns and faults consistent with a life well lived.

01

The Collection

THE EVOLUTION OF CHARACTER

There are two attractive decors, the warm and natural Coast Evoke Oak and the darker, almost monochrome Fossil Evoke Oak. They have a time worn feel featuring cracks and splits, with what appears to be black filler repairs. There is a depth of colour, of rusticity and character that brings warmth and harmony to traditional or contemporary living areas. Available in MF PB, MF MDF, MFHDF and Worktops with matching laminates and edging.

The texture

THE LOOK AND FEEL OF VENEER

Available on our Pure Wood (PW) texture; a stunningly realistic timber effect with a semi-matt finish that looks uncannily like a lightly polished veneer, but with all the manufacturing benefits of Melamine Faced Boards; strength, reliability, easy to work and a totally consistent performance. The Evoke Oak worktops are finished with the Fine Pore (FP) texture, similar to the Pure Wood, a finer, more delicate grain structure but with the same subtle sheen.

FP Fine Pore

The Combinations

MIX AND MATCH, COMPLEMENT AND CONTRAST

There are endless combinations that bring out their own distinctive characters when blended together. The Evoke Oaks rustic woodgrains really pair well with distinctive stone patterns and neutral colors. And they have a great working relationship with the hybrid range of Flow decors as you can see in these up-cycled combos.

The integrated solution

SEAMLESS HARMONY ACROSS THE RANGE

With Kronodesign® decorative surfaces you are getting an exclusive, high quality and on-trend design, but we always ensure that our products are complementary. So whatever the project our products all work well together, giving designers and craftsmen the freedom and flexibility to create without restrictions. So there are always perfect matches across a range of products as well as laminates, edging and foils. This is what we call integrated solutions.

05

The environment

BIG STEPS TO A SMALL CARBON FOOTPRINT

Manufactured at our factory in the UK from a mix of recycled and FSC® certified timber, Kronodesign boards are environmentally friendly and 100% recyclable.

And in the home environment our Melamine boards and HPL have exceeded the international standard ISO 22196:2011 (which measures a surface's antibacterial effectiveness and the reduction in bacteria over a 24-hour period). So not just practical, beautiful and green, reassuringly hygienic too.
