*feel*Ness
sense of touch

To create visually striking interiors, we played with light and reflection, and created a new line of matt and gloss boards, named FeelNess. The new boards can bring in elegance and exclusivity to any project, while offering a great haptic experience. Their tactile finish defines the feel of the space and stands out from other furniture surfaces. Glossy or Matt, it's a personal choice, and each has its own beauty and advantages.

PET Laminated MDF

PET Laminated MDF is a high-quality MDF board covered with matt or gloss PET foil. The decor range includes our top-selling uni colors, and it is 100% coordinated with the Kronodesign® collection. The front and back sides of the boards are manufactured in the same color.

The hot melt Polyurethane adhesive technology guarantees excellent bonding and a flat surface with moisture protection. All 20 matt and 10 gloss designs are available in stock.

HPL Bonded MDF

HPL Bonded MDF is a composite moisture-resistant MDF board covered with an HPL sheet.

The top surface has a velvety texture and a luxurious soft-touch tactile effect. It features an anti-fingerprint (AF) finish and a secured bond thanks to the hot melt polyurethane adhesive technology. Both the front and back sides of the boards are produced in the same color. All 12 designs are available in stock.

The depth, elegance, and functionality of the matt finish are embraced by designers and architects, giving colors a warm and inviting appearance.

FeelNess Ultra Matt is MDF faced on both sides with decorative Ultra Matt PET foil. The product is ideal for superior quality projects, especially cabinet doors. The surfaces are secured with a PE protective film, which should be removed after the furniture is assembled. The matt surface of the boards should be cleaned with non-abrasive cleaning agents for plastics. The boards can be formatted on all conventional saws and can be edged on all standard edging lines.

The High Gloss can make an interior feel really glam, its shiny and light-reflecting surface immediately makes a statement. High Gloss finishes provide a modern, yet chic look.

FeelNess High Gloss is an MDF covered with decorative High Gloss PET foil on the front side and grainy textured identical color PP foil on the reverse. The high surface strength is secured by an additional PE protective film on the front side of the board, which should be removed only after the furniture has been assembled. It stands up exceptionally well to scrubbing and regular cleaning with non-abrasive cleaning agents designed for plastic surfaces. PET Laminated MDF boards can be formatted on all conventional saws and can be edged on all standard edging lines.

FeelNess Invisible Touch boards feature an attractive and aesthetic appearance. They have a high resistance to impact, scratch and surface abrasion. FeelNess Invisible Touch boards do not corrode, have good dimensional stability, and are resistant to moisture, heat, cold, and stains.

FeelNess Invisible Touch consists of a moisture-resistant MDF board bonded with Invisible Touch HPL on the front side and the same color Standard HPL on the reverse. It's a high scratch and impact-resistant product suitable for areas subject to high hygiene requirements. The special anti-fingerprint property prevents unsightly fingerprints on the surfaces and reduces the amount of cleaning required.

Storage Instructions

The boards should be stored in a dry, clean, and roofed place.
The material should be acclimatized 72 hours prior use in a room.
It is recommended to store them in the original Kronospan packaging, on pallets.
The protective foil should be removed immediately after assembly.
The boards should be stored without extra load on the flat surface.

Cleaning Instructions

To remove stains caused by substances such as coffee, tea, oil, or wine, we recommend the use of using clean water, a damp cloth, or mild detergent cleaner like dishwashing liquid. Dilutions of all sorts of commercially available cleaners for plastic surfaces consisting of ionic or non-ionic detergents are acceptable. After cleaning, the surface acceptable to can be rinsed with clean water and dried with a soft cloth.
Not recommended: abrasive cleaning materials and accessories such as sponges with an abrasive surface, abrasive cleaners and cleaning polishes, and concentrated acids. Using any of these are is not recommended as they can cause irreversible damage to the surface and its properties.
